

WG-1855HOS U-FEEL SPE

The Wonder Grip® WG-1855HOS U-Feel Spe is a glove with a single nitrile coating constructed on a 18-gauge polyester and spandex liner. Our Wonder Grip Performance™ dipping offers an outstanding thin and smooth protective coating, delivering incomparable levels of sensitivity and dexterity at your fingertips. Incredibly thin and soft, it gives users a second skin feeling, providing an exceptional level of comfort and precision, ideal for precision tasks. Now available with unique micro dots on the palm for enhanced anti-wear resistance properties and grip performance.

PRODUCT INFORMATION

PROTECTION	General purpose, heat resistance.
MATERIAL	Coating: Nitrile, palm coated. Liner: 18 gauge/Spandex and polyester.
COLOUR	Black coating, orange liner.
PACKAGING	12 pairs/polybag; 144 pairs/box.
SIZES	8/M, 9/L, 10/XL.

KEY FEATURES

- Anatomically engineered, reducing hand fatigue and ensuring an ultimate level of precision and comfort.
- Grip performance for safe handling in dry-to-oily applications.
- IT-compatible with touch screen functionality for improved working conditions.
- High-visibility orange to ensure the user's hands are visible and be safer on the job.
- Unique micro dots on the palm for enhanced wear resistance properties and grip.

ENVIRONMENTS

Assembly, electronics, DIY, warehousing packing and logistics, public authorities, aerospace, automotive.

WONDER GRIP® TECHNOLOGY

GRIP

Our focus is on developing gloves that are thin and easy to use whilst providing the best grip through the design and material used for each glove. We believe grip strength will improve safety.

The sponge-like coating on each Wonder Grip® glove mimics the suction cup characteristics found on the tentacles of an octopus, our focus on maximising the quality, durability and grip potential of each Wonder Grip® glove design has significantly enhanced performance in dry, wet and oily conditions.

NITRILE

Nitrile has the advantage of being resistant to friction and oil. Wonder Grip® gloves have not only encompassed the advantages of nitrile but also dramatically improved their overall oil grip strength.
