

**PRODUCT CODE:** RE-HALMADBL

**PRODUCT DESCRIPTION:** Half Mask Respirator with Double Cartridge

## MATERIALS AND FEATURES

Thermo plastic elastomer (TPE) mask with plastic exoskeleton. Hypo-allergenic material with soft, comfortable fit, ensuring best seal against harmful gases. Extremely lightweight.

Adjustable head cradle with quick release clips.

Double cartridge design for maximum breathability.

Downward facing exhalation valve to reduce possible fogging of lenses

Bayonet system for cartridges, ensuring quick, easy fitting.

Low profile design to ensure maximum visibility for user.

## CERTIFICATION

EN/ISO REQUIREMENT	EN 140:1998
SABS	SANS 50140: 1998
NRCS	NRCS: NRCS/8072/0432
CE REQUIREMENT	CE 2834 Regulation (EU) 2016/425

## WARNINGS

Please read user instructions in full before wearing this mask – refer to [www.rebelsafetygear.com](http://www.rebelsafetygear.com)

Only to be used in conjunction with both REBEL cartridges – supplied separately.

These respirators do not supply oxygen – do not use where oxygen concentration is less than 19.5%.

The half mask is reusable but must be cleaned and visually inspected as per the inspection procedures listed in the user instructions.

The filter cartridges (gas filters) are reusable but must be replaced once chemical breakthrough can be determined by smell or taste. Please read the user instructions to determine when they must be replaced.

Particle pre-filters can also be used with the half mask. Please read user instructions to determine when they must be replaced.

Consult your Health & Safety representative if you are unsure about this mask's suitability for the environment, or else if you are unsure how to use it.

## CARE/STORAGE

### MAINTENANCE

After use, the half mask must be checked and cleaned.

### CLEANING AND STORAGE INSTRUCTIONS

- Cleaning is recommended after use.
- Remove filters before cleaning.
- Clean the facepiece with medical grade alcohol and let dry at room temperature.
- The cleaned respirator should be stored away in its original packaging or in a container away from direct sunlight and heat.

### SHELF LIFE

5 years from date of manufacture, as shown on mask and packaging.

## SUGGESTED ENVIRONMENTS

- Industrial settings: Factories, manufacturing plants, chemical processing facilities.
- Construction sites: Protection against dust, fumes, and other airborne particles.
- Laboratories: Protection against chemical fumes and vapors.
- Agriculture: Protection against pesticides and other agricultural chemicals.
- Painting and refinishing: Protection against paint fumes and solvents.
- Pharmaceutical: Protection against airborne contaminants in pharmaceutical manufacturing.
- Emergency response: Protection during hazardous material spills or cleanups.

**Disclaimer:** The appropriate cartridges would have to be utilised based on the specific hazards present in the environment to ensure effective protection.
